

## ADE9000 Arduino-Compatible Energy and Power Quality Measurement Shield

### FEATURES

Arduino-compatible energy and power quality measurement shield with ADE9000 multiphase energy and power quality monitoring IC  
 3P4W, 3P3W, or 3-wire single phase measurements  
 Direct interface with current output current transformers  
 Up to 240 V rms nominal line neutral voltage measurement  
 Arduino software library  
 Calibration and example application sketches

### ADDITIONAL EQUIPMENT NEEDED

Arduino Zero or equivalent  
 Current transformers  
 Voltage leads  
 USB microcable

### DOCUMENTS NEEDED

ADE9000 data sheet  
 ADE9000 Technical Reference Manual

### SOFTWARE NEEDED

Arduino IDE 1.8.1 or later  
 ADE9000 library files

### GENERAL DESCRIPTION

The EV-ADE9000SHIELDZ is an Arduino shield compatible with Arduino Zero. The shield can be directly interfaced with current transformers and voltage leads. It enables quick evaluation and prototyping of energy and power quality measurement systems with the ADE9000. Arduino library and application examples are provided to simplify implementation of larger systems.

### HAZARDOUS HIGH VOLTAGE

This equipment is connected to hazardous line voltages. Exercise proper caution when connecting the sensors and voltage leads. Ensure that the system is enclosed in a protective casing.

### CONNECTION DIAGRAM

Figure 1. EV-ADE9000SHIELDZ Connection Diagram

## REVISION HISTORY

1/2018—Revision 0: Initial Version

## MODULE HARDWARE

### POWERING THE ADE9000 SHIELD

The EV-ADE9000SHIELDZ requires 3.3 V and 5 V. It is powered from the 3.3 V power pin and 5 V power pin from Arduino or ESP8266.

### ARDUINO ZERO

The [ADE9000](#) shield has Arduino R3 headers directly compatible with Arduino Uno and Arduino Zero. Using the EV-ADE9000SHIELDZ with Arduino Zero or equivalent is recommended. The Arduino pins used by the [ADE9000](#) shield are given in Table 1.

**Table 1. Arduino GPIO Connections**

Arduino Pin	ADE9000 Signal	Type
ICSP-SCK	SCLK	SPI
ICSP-MISO	MISO	SPI
ICSP-MOSI	MOSI	SPI
GPIO 8	CS (pulled up)	SPI, output
GPIO 4	PM1 (pulled down)	Output
GPIO 5	RESET (pulled up)	Output
GPIO 2	IRQ0	Input (interrupt)
GPIO 3	IRQ1	Input (interrupt)
GPIO 6	CF4/DREADY/EVENT	Input (interrupt)
GPIO 7	CF3/ZX	Input (interrupt)
3.3 V	Not applicable	Power
5 V	Not applicable	Power

### ESP8266 WIFI MODULE

The shield can also be used with the ESP8266 WiFi module. The on-board header makes the shield compatible with ESP8266 ESP-12E NodeMCU. To use ESP8266, do the following:

- Solder 15-pin headers (SV1 and SV2)
- Populate 0 Ω resistors on R49, R51, R67, and R68 located on the bottom of the board to establish an SPI connection.
- Optionally, supply external 5 V at J9 if the computer USB does not provide enough current during debugging.

The ESP8266 pins used by the EV-ADE9000SHIELDZ are given in Table 2.

**Table 2. Arduino General-Purpose Input/Output (GPIO) Connections**

ESP8266 Pin	ADE9000 Signal	Type
D5 (GPIO 14)	SCLK	SPI
D6 (GPIO 12)	MISO	SPI
D7 (GPIO 13)	MOSI	SPI
D0 (GPIO 16)	CS (pulled up)	SPI, output
D8 (GPIO 15)	PM1 (pulled down)	Output
D1 (GPIO 5)	IRQ0	Input
D2 (GPIO 4)	IRQ1	Input
3.3 V	Not applicable	Power
5 V	Not applicable	Power

### CURRENT SENSORS

The EV-ADE9000SHIELDZ is designed to work directly with current output current transformers (CTs). Connect the CT leads to the SL1, SL2, SL3, and SL4 terminal blocks.

#### Current Output CTs

The EV-ADE9000SHIELDZ has on-board burden resistors in differential configuration to allow direct connection with current output CTs. With a typical 2500:1 CT, the maximum recommended current is 86 A rms. Refer to the [ADE9000 Technical Reference Manual](#) to modify burden resistors for different current ranges.

#### Voltage Output CTs

To use voltage output CTs, remove burden Resistors R1, R2, R3, R4, R10, R11, R19, and R20. The maximum recommended CT output voltage is ±0.353 V rms.

#### Rogowski Coils

To use Rogowski coils with EV-ADE9000SHIELDZ, do the following:

- Remove burden Resistors R1, R2, R3, R4, R10, R11, R19, and R20.
- Replace 0 Ω Resistors R5, R6, R14, R15, R21, R22, R23, and R24 with 100 Ω resistors.
- Populate C15, C16, C17, C18, C21, C22, C26, and C28 with 22 nF ceramic C0G grade capacitors.
- In the ADE9000API.h file, do the following:
  - Set the INTEN and ININTEN bits in the CONFIG0 register.
  - Set DICOEFF to 0xFFFFE000.
  - If the Rogowski output signal is too low, increase the PGA gain.

### VOLTAGE SENSORS

The EV-ADE9000SHIELDZ has on-board resistor dividers to attenuate the incoming input voltage. The attenuation factor is 801. Do not exceed the 240 V rms nominal line to neutral voltage in the 3-phase, 4-wire (3P4W) wye configuration. In 3-wire delta configuration, when Phase B is used as the reference, do not exceed 250 V rms line to line voltage. There are 4 mm banana jacks on board to connect the voltage inputs. Use TPI A079 or equivalent leads with alligator clips to connect the voltage inputs.

## LIBRARIES

The EV-ADE9000SHIELDZ Arduino libraries provide basic functions to access the [ADE9000](#). The calibration sketch can be used to calibrate the [ADE9000](#) using an accurate source.

## INSTALLING THE LIBRARIES

Download ADE9000ArduinoLibrary.zip.

Install the [ADE9000](#) Arduino library, as shown in Figure 2.

Figure 2. Installing Arduino Library. Original Content Hosted by Arduino, Available at [www.arduino.cc](http://www.arduino.cc); Content from Arduino Republished Here Under the Creative Commons Attribution-ShareAlike 3.0 Unported License, License Available At [www.arduino.cc/en/Main/CopyrightNotice](http://www.arduino.cc/en/Main/CopyrightNotice); All Other Rights Reserved by Analog Devices, Inc.

## ADE9000 ARDUINO LIBRARY

### **ADE9000API.cpp**

The ADE9000API.cpp file contains functions to communicate, initialize, and read calculated parameters from the chip.

### **ADE9000API.h**

The ADE9000API.h file contains register constants that are written into the device by the SetupADE9000 function.

### **ADE9000CalibrationInputs.h**

The ADE9000CalibrationInputs.h file contains the system information used to calibrate the [ADE9000](#). It is used by the [ADE9000](#) Calibration.ino sketch to compute the calibration constants. The calibration constants are stored in the EEPROM.

### **ADE9000 Application Examples**

The application examples demonstrate the use of functions in ADE9000API.cpp and ADE9000API.h library files to obtain the parameters calculated by the [ADE9000](#). Connect Arduino Zero, and compile and load the application examples to start measuring energy and power quality.

## LINE VOLTAGE CONNECTIONS

The EV-ADE9000SHIELDZ is connected to hazardous line voltages. Exercise proper caution when connecting the sensors and voltage leads. Ensure that the system is enclosed in a protective casing.

### 3-PHASE, 4-WIRE (3P4W) WYE

The 3P4W wye connection is shown in Figure 3. Do not exceed the nominal voltage of a 240 V rms line to neutral in wye configuration.

Figure 3. 3P4W Wye Connection

### 3-PHASE, 3-WIRE (3P3W) DELTA

The 3P3W delta connection is shown in Figure 4. Phase B is used as the reference; therefore, the neutral channel on the board is connected to Phase B. Do not exceed the 250 V rms

line to line voltage in the delta configuration. When using the delta configuration, take the following actions in the ADE9000API.h file:

- Set VCONSEL to 001 so that  $VB = VA - VC$ .
- Set ICONSEL to 1 so that  $IB = -IA - IC$ .

Figure 4. 3P3W Delta Connection

**ESD Caution**

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

**Legal Terms and Conditions**

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
