DESCRIPTION

The 1100R Series is a general purpose range of inductors suitable for low to medium current applications. Their small footprint makes them ideal for high density applications where a chip inductor will not cope with the power requirement.

Operating free air temperature range	-40°C to +85°C		
Storage temperature range	-40°C to 125°C		

SOLDERING INFORMATION ²				
Peak wave solder temperature	260°C for 10 seconds			
Pin finish	Bright tin			

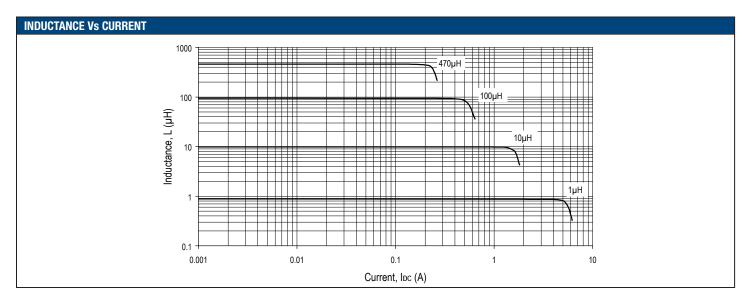

All specifications typical at T_A =25°C

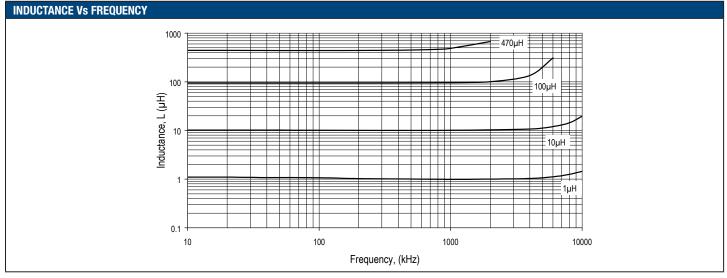

- 1 Maximum DC current occurs when either the inductance falls to 90% of its nominal value or when its temperature rise reaches 30°C, whichever is sooner.
