## EMM W 3/5-500-EX

## Electronic Motor Management

## Data Sheet

## Features

EMM provides all the advantages of modern active power monitoring. The active-power input of a drive system or another 3-phase load is calculated every 6.6 ms from three currents, voltages, and the phase angle.

Currents greater than 5 A are led to the module via transformers. The load is switched by a separate switching element. In this way, the EMM reliably protects connected loads - regardless of their current consumption - against overload and underload and provides continuous status monitoring.

Switching thresholds, signaling thresholds, and four configurable confirmation outputs provide motor and system protection.
All relevant values can be viewed via the integrated display of the configuration software or a fieldbus interface:

- Apparent power, active power, and reactive power
- Currents and voltages
- Phase angle
- Operating cycle counter and elapsed-hour meter
- Power meter

The integrated memory can be used to record complete curves, which can be used, for example, in the system documentation.
Actuators and variable-speed drives, pumps, etc. are connected using the right rotation, left rotation, reverse, and limit switch modes (with integrated restart inhibit) and at the same time are monitored and protected against dirt or wear.

The EMM W 3/5-500-EX is specially designed for use in the chemical and petrochemical industry.
A corresponding ex-type examination certificate is available.

## Technical Data

| Input Data | $24 \mathrm{~V} \mathrm{DC} \pm 20 \%$ |
| :--- | :--- |
| Module supply $U_{\mathrm{N}}$ | 80 mA |
| Maximum current consumption | $24 \mathrm{~V} \mathrm{DC} \pm 20 \%$ |
| Control voltage right/left | 7 mA |
| Current consumption right/left | $24 \mathrm{~V} \mathrm{DC} \pm 20 \%$ |
| Switching output supply | 2 A |
| Input current | LED, diode for protection against polarity reversal, <br> surge protection |
| Input wiring |  |

| Power Measurement |  |
| :--- | :--- |
| Voltage input V1, V2, V3 | $110 \mathrm{~V} \mathrm{AC}-575 \mathrm{~V} \mathrm{AC}, 50 / 60 \mathrm{~Hz}$ |
| Nominal current at 550 V AC | 6 mA |
| Input wiring | RCV circuit |
| Current measuring input L1/T1, L2/T2, L3/T3 | 5 A AC, maximum |
| Maximum cable length between the transformer <br> and EMM | $5 \mathrm{~m} \mathrm{(16.40} \mathrm{ft)} \mathrm{at} \mathrm{2.5mm}^{2}(14 \mathrm{AWG}) / 3 \mathrm{~m} \mathrm{(9.84} \mathrm{ft)} .\mathrm{at} 1.5 \mathrm{~mm}^{2}(16 \mathrm{AWG})$ |

## Output Data

| Confirmation outputs O1, O2, O3, O4 with 1 signal | $\mathrm{U}_{\mathrm{N}}-1 \mathrm{~V} / 50 \mathrm{~mA}$, maximum |
| :--- | :--- |
| Switching output OL, OR with 1 signal | $\mathrm{U}_{\mathrm{N}} 2 \mathrm{~A}$ |
|  | Free-wheeling diode, surge protection, protected <br> against short circuits and overloads |

| General Data |  |
| :--- | :--- |
| Housing dimensions (length $\times$ width $\times$ height $)$ | $107 \mathrm{~mm} \times 62 \mathrm{~mm} \times 120 \mathrm{~mm}(4.213 \times 2.441 \times 4.724 \mathrm{in}$ ) |
| Insulating housing version | Polycarbonate (PC), color: green |
| Test voltage I/O | 2.5 kV rms |
| Ambient operating temperature range | $-20^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}\left(-4{ }^{\circ} \mathrm{F}\right.$ to $\left.+140^{\circ} \mathrm{F}\right)$ |
| Standards/specifications | EN 61000-4-2/DIN EN 61000-4-2/VDE 0847-4-2; <br>  <br> EN 61000-4-3/DIN EN 61000-4-3/VDE 0847-4-3; <br> EN 61000-4-4/DIN EN 61000-4-4/VDE 0847-4-4; <br> EN 61000-4-5/DIN EN 61000-4-5/VDE 0847-4-5; <br> EN 61000-4-6/DIN EN 61000-4-6/VDE 0847-4-6; <br> IEC 60664/IEC 60664 A/DIN VDE 0110 |
| Safe isolation input/output | DIN EN 50178 (VDE 0160) |
| Degree of protection according to <br> IEC 60529/EN 60529/DIN VDE 0470-1 | IP20 |
| Mounting position | Vertical (DIN rail horizontal) |
| Mounting | Can be mounted with spacing $\geq 20 \mathrm{~mm} \mathrm{(0.787} \mathrm{in)}$. |

| Safety Data |  |  |  | II (2) GD | PTB 03 ATEX 3114 |
| :--- | :--- | :--- | :---: | :---: | :---: |
| EU-type examination according to ATEX | AK4 |  |  |  |  |
| Requirement class according to DIN V 19251 | 3 |  |  |  |  |
| Category according to EN 60954-1 |  |  |  |  |  |

## Connection Data

Figure 1 Connection data
The following cable cross sections can be connected:

| Solid <br> $\left[\mathrm{mm}^{2}\right]$ | Stranded <br> $\left[\mathrm{mm}^{2}\right]$ | AWG | Stripping <br> Length L $[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| $0.2-6$ | $0.2-4$ | $25-10$ | $8 \mathrm{~mm}(0.31 \mathrm{in})$. |

## Block Diagram

Figure 2 Block diagram

## Connection Versions

## Switching Element

Depending on the application, an electromechanical contactor or a contactor-type reversing starter combination, or an electronic load relay or a reversing-load relay should be used to actually switch the load.

The EMM has two switching outputs with $24 \mathrm{~V} \mathrm{DC} / 2 \mathrm{~A}$ to control these switching elements.

Figure 3 Connection version 1: Conductor currents $<5 \mathrm{~A}$, without external current transformers

## Current Transformer

Separate current transformers should be used for currents greater than 5 A . Transformers with a secondary nominal current of 5 A should be selected.

The primary nominal current is determined by the current consumption of the device (see Figure 4).

Figure 4 Connection version 2: Conductor currents $>5 \mathrm{~A}$, with external current transformers

## Ordering Data

| Description | Order Designation | Order No. |
| :--- | :--- | :--- |
| Electronic motor management | EMM W 3/5-500-EX | 2963682 |
| For marking systems and assembly material, see CLIPLINE catalog. |  |  |
